EXPERIENCE

Metron Security

Jan 2026 – Present

Software Engineer

Pune, Maharashtra

- Delivered end-to-end features for 5+ international client projects, from scoping through production
- Built a RAG assistant for a cloud security platform to enable natural-language troubleshooting and remediation
- Developed RAG powered root cause analysis capabilities for ADEM and exposing API for ServiceNow integrations
- Collaborating with cross-functional teams to deliver security-focused software solutions

Associate Software Engineer

Jan 2025 - Dec 2025

- Built and deployed a Jira Forge application to track project status and streamline project management workflows
- Worked on authentication and authorization mechanisms using FastAPI and JWT, including role based access
- Implemented PostgreSQL backed REST APIs using FastAPI for reliable data management and backend services

Touchmedia Ads

Dec 2023 – Jan 2025

Fullstack Developer Intern

Pune, Maharashtra

- Developed a dynamic admin panel using React.js and Node.js for remote content management and administration
- Implemented RESTful APIs, JWT based authentication and secure file storage using Cloudinary
- Integrated Axios for API communication and implemented CRUD operations for efficient data management
- Improved user experience using Yup validation and toast notifications for real-time feedback

PROJECTS

AI Document Intelligence Platform | *Python, FastAPI, RAG, PostgreSQL, AWS*

May 2026 – June 2026

- Built a RAG application using FastAPI, pgvector and LLM APIs for document based question answering.
- Implemented document ingestion, chunking, embeddings, semantic search, reranking, and grounded responses.
- Developed streaming chat APIs with conversation history, access control, metadata filtering, and citations.
- Containerized the application with Docker and integrated AWS S3 for document storage and deployment.

HelpPilot | *Python, Django, React, PostgreSQL, AWS*

Jan 2026 – Feb. 2026

- Built an AI-powered support platform using Django REST Framework for automated ticket management.
- Implemented AI-based ticket classification, priority detection, summarization and response generation using RAG.
- Developed JWT authentication, implemented RBAC and real-time communication using WebSockets.
- Containerized services with Docker and deployed the application on AWS EC2 with S3 for file storage.

TECHNICAL SKILLS

Languages: JavaScript, Python, C/C++, SQL, HTML/CSS

Databases: PostgreSQL, MongoDB, pgvector

Frameworks: React, Node.js, Redux, FastAPI, Django

Developer Tools: Git/Github, VS Code, Postman

Cloud & DevOps: AWS (EC2, S3, Lambda, CloudFront, IAM, Bedrock), Docker

EDUCATION

Sinhgad College of Engineering

Pune , Maharashtra

Bachelor of Engineering in Information Technology - 8.65

August 2020 – June 2024

Siddhi English Medium School & Junior College

Nashik , Maharashtra

Higher Secondary School - 80%

June 2018 – June 2020

ACHIEVEMENTS

- Achieved 317th position in the **Amazon ML Hackathon 2023** by successfully developing a solution for the problem statement "Product Length Prediction".
- Successfully participated in **Hacktoberfest 2023, 2024 and 2025**, contributing to **Open Source Projects** and showcasing commitment to community collaboration.
